

ZipPark's zControl Software Provides:

License Plate Registration: allows vehicle information of returning customers to automatically populate after license plate is entered into system. Greet your return customers by name.

Flexible Rate Structures: authorized personnel can easily configure all rates and validations without being onsite.

Real Time/ Web Based Reporting: access real-time reports onsite or from your office.

Ability to Pre-Print Tickets: handle events and busy times with ease using our exclusive pre-printed ZipTickets. Simply update the system with vehicle details when the rush is over.

Custom Configuration: collect only the information that is important to your operation.

Efficient Vehicle Retrieval: print a runner stub indicating vehicle location when patron is ready to claim vehicle.

Monthly Parkers Plans: easy to manage individual or corporate plans.

Reduce False Claims: instantly record vehicle damage and link information to the ticket.

Internet Reservations: allow patrons to reserve a parking space through any public website.

ZipPark's Point of Sale offers high performance and reliability while providing easy to use touch screen technology.

This IBM POS accommodates your needs with options including a magnetic stripe reader for credit cards, integrated cash drawer, and receipt printer. ZipPark also provides a barcode scanner and high-speed ticket printer to complete the package.

ZipPark's Mobile Point of Sale

elevates your business's flexibility by streamlining vehicle drop off and pickup.

The mobile POS allows attendants to issue tickets and cashier customers in the lane, utilizing the secure wireless technology. Improve customer service by greeting customers as they pull up to your facility.

ZipPark's Self Serve Kiosk

Free up staff by conveniently positioning our IBM Anyplace Kiosks around your establishment. It allows customers to initiate the retrieval process and pay their fees. Available with optional freestanding enclosure, wall-mount or desk mount kit.

ZipPark's Jockey Console tracks vehicle movement throughout the entire process.

The Jockey Console provides a real time list of retrieval requests and lists the jockey assigned to the vehicle retrieval. Our Jockey Console also provides status of deliveries in progress.

ZipPark's Camera Claims Package

automatically captures a photographic image of vehicles in the lane.

It documents every vehicle's condition on entry and exit to assist in minimizing fraudulent damage claims while monitoring vehicle movement and jockey activity.
